

Virtual Background & Blur

Overview: The Virtual Background feature allows you to display an image or video as your background during zoom. **Note:** Blur effect must be on a Window or MacOS using the desktop client version 5.2 or higher and has an Intel I3 or higher chip. Chrome OS does not support Virrtual Backgrounds or Blure Backgrounds. See additional information here: <u>https://support.zoom.us/hc/en-us/articles/360043484511</u>

Using Virtual Background (Before a Meeting Windows / MacOS)

- 1. Sign in to the zoom desktop client
- 2. Click on your profile picture or your profile initials then click settings.

- 4. Check the greenscreen box if you have a physical green screen set up. You can then click on your video to select the current color for the greenscreen
- 5. If you don't have a green screen leave the option unchecked and follow below

6. Click on an image to select the desired virtual background or add your own image by clicking + and choosing if you want to upload an image or video.

7. If prompted, click Download to download the package for virtual background without a green screen.

Virtual Background (During a Meeting Windows / MacOS)

- 1. In a Zoom meeting, click the upward arrow (^) net to start/stop video.
- 2. Click choose Virtual Background

	Select a Camera (0 XXN to switch) ✓ Logitech BRIO FaceTime HD Camera (Built-In) Choose Virtual Background
